How are courses structured? What courses do we offer?

A Before initiating a course, we carry out an assessment of the goals and needs of the students in order to plan relevant materials to cover during the course. If required, we also test the skill level of the students.

B Our language courses follow the Common European Framework. We also provide courses to build skills or specific needs including preparation for official exams (First Certificate, CAE, Proficiency, TOEFL, IELTS, DELE, DELF).

C Our team of language teachers are carefully selected and periodically reviewed based on the student evaluations. All our teachers are chosen for their training and experience as well as for their motivation and empathy.

D Upon course completion, on request, a final progress report will be written and will include recommendations for further progress.
